

الذكرى الأولى لإطلاق القمر الصناعي الكومنس

وما سبق هو مشروع مسجل في إطار البرنامج الفضائي الوطني أفق 2020، ويهدف إلى تعزيز طبقة في مجال الاتصالات من خلال:

يختلف القمر الصناعي المغربي في التفاصيل لكنه يعتمد على نفس المكونات الرئيسية. يتضمن المكونات الرئيسية التالية:

- القمر الصناعي:** يمثل جهاز الرصد والبيانات، وهو مكون أساسي يحتوي على معدات لجمع البيانات ونقلها.
- القمر الصناعي المغربي:** هو جهاز مصمم خصيصاً لرصد المحيطات والغلاف الجوي، مما يسمح بتحصين الاتصالات السلكية واللاسلكية واستقبال العديد من برامج البث الفضائي.
- الرادار:** يستخدم لتحديد المواقع وتقدير المسافر.
- الملاحة:** تساعد في تحديد المركبات والسيارات.
- الاتصالات:** تتيح القدرة على نقل البيانات والبيانات.

anniversary of the launch of the satellite ALCOMSAT-1

asat-1 project is a part of the National Space Program - NSP- horizon 2020, and is aimed at securing national sovereignty in telecommunications through:

- plementing a performant and secured transmission network;
uring the continuity of telecommunication services in case of major risks;
nding the capacity of the national telecommunication network;
entralizing the activities and the services concentrated in the north of the country
gh the deployment of an optimized
unication network;
ucing the operation costs due to the use of space capacity of international telecommunication
ms;

ology and know-how transfer. December 11th, 2017 at 00 h 40mn, on the Chinese LongMarch-3B (LM-3B) launch vehicle, the Algerian telecommunication satellite *Asat-1* was successfully launched from Xichang launch base, located in the province of Sichuan at 2,200 Km south-west of Beijing. The satellite Alcomsat-1 reached its geostationary orbit at 36,000 Km and its orbital position at 12° East, after six days and five orbital maneuvers. *Asat-1* satellite is in operation mode since the fulfillment of stationing and in-orbit tests phases. The control and the operation of the satellite are performed by the engineers of the Algerian Space Agency, from the telecommunication systems operation centers of Bouchaoui (Algiers) and El Aouzou (Medea). *Asat-1* is a valuable multi-mission tool offering a national (Algeria) and regional (North Africa and Europe) coverage. It helps in the improvement of the telecommunications and the reception of various television broadcasting programs. It also offers audio transmission services, broadband data services and the possibility to implement different applications such as e-learning, e-medicine and videoconferencing applications.

خطائص

- الرسم: ز مسلسي
 - القيمة: 25 دج
 - حجم الطابع: 36x26
 - المطبعة: مطبعة البنك المازنزي
 - طريقة الطبع: الألوان
 - الوثيقة الطوابعية: طرف مصر
 - البيع المسبق: يومي الثلاثاء
 - البيع العام: يوم الخميس 13
